He is involved in various research assignments in collaboration with faculty from Essex University (UK), Leader's Institute (Australia), Qassim University (Saudi Arabia) and Drexel University (USA).

## Keynote speech: Innovation and industry 4.0.

Today, global manufacturing sector is undergoing a structural transformation. New paradigm that is in tune with the digital 21st century is fast emerging which is driven by Industry 4.0. This will result in the "Smart Factory", which is characterized by versatility, resource efficiency, ergonomic design and direct integration with business partners, ultimately resulting in higher productivity, global competitiveness and sustainable profitability. Industry 4.0 is driven by an amalgamation of emerging technologies like Internet of Things, Business Analytics, Augmented Reality, Artificial Intelligence, Elemental Design, Simulation, 3D Printing, Advanced Robotics and Cyber-physical Systems. Industry 4.0 would mean the convergence of real and virtual worlds. The next phase is bringing together conventional and modern technologies in manufacturing. The special track will prove as platform to deliberate upon research papers submitted based upon fundamental and applied research as well as innovation.
